

THINK FRESH!™

FLAVIA® CREATION 400™

A PERFECT SINGLE-SERVE BREWER FOR
YOUR OFFICE OR WORKPLACE

CONVENIENCE FOR THE OFFICE OR WORKPLACE

Designed especially with the needs of your office or workplace in mind:

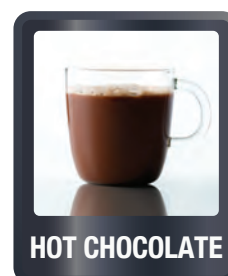

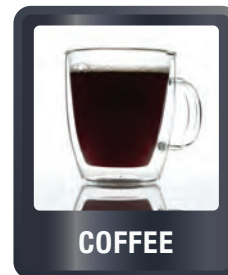

- Quick, easy-to-use technology with single-serve drinks ready in 40-60 seconds
- LCD display with interactive software to guide the user when selecting drinks categories and options
- No clean up, no mess, brews one cup at a time
- Portable and flexible – can be used as jug filled or plumbed in
- Easy-fill water tank
- Small and compact counter-top design
- A sleek and stylish look
- Industry-leading reliability with a record of over a year and a half between service calls*
- Helps keep the workplace running smoothly

FLAVIA DOES MORE

FLAVIA brewers are designed to meet individual drinks demands. By selecting a range of products from our speciality single-serve brands, everyone in the office will be satisfied.

Choose from a variety of single-serve drinks including freshly roasted and ground coffee, real-leaf teas, herbal infusions and premium hot chocolate.

Plus, our innovative technology enables you to brew authentic frothy cappuccinos, lattes and mochas so you can enjoy coffee shop specialities right in your workplace.

* Mars Drinks internal quality report; mean time between failure calculated from UK machine base for 2011

EXCEPTIONAL OFFICE PERFORMANCE

As our business is totally focused on the needs of the workplace, we have designed the FLAVIA CREATION 400 specifically for THESE PURPOSES:

- Directly contributes to increased office interactions, higher levels of engagement and satisfaction, and improved productivity and morale*
- Sleek and compact design to fit your office or collaborative workspace
- Brews a full range of single-serve drinks including coffee shop specialities to satisfy everyone's needs
- Brews directly from pack to cup, eliminating taste contamination from one drink to the next
- When used unplumbed, the large tank capacity allows 13 drinks to be brewed before refilling

FLAVIA BREWS BETTER

Our innovative single-serve brewing process:

- STEP 1** **SOURCE:** We start with the highest quality ingredients – freshly roasted and ground coffee, real-leaf and herbal teas and premium hot chocolate.
- STEP 2** **SEAL:** We pack our carefully sourced ingredients into the unique FLAVIA Freshpack locking in their freshness and flavour.
- STEP 3** **SERVE:** We specially design the Freshpack to work with the FLAVIA brewer. Together they create an optimal brewing cycle within every pack. Every drink is brewed directly from pack to cup with no taste contamination, so your tea will never taste like the coffee that was made before it and vice versa.

* Mars Drinks partnered with McKinsey & Company to execute a landmark study focusing on a select group of businesses in North America that were asked to introduce FLAVIA to their employees, and study the changes that the FLAVIA beverage system had on their workplaces.

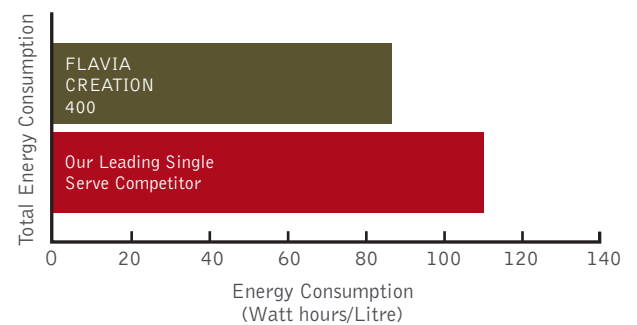

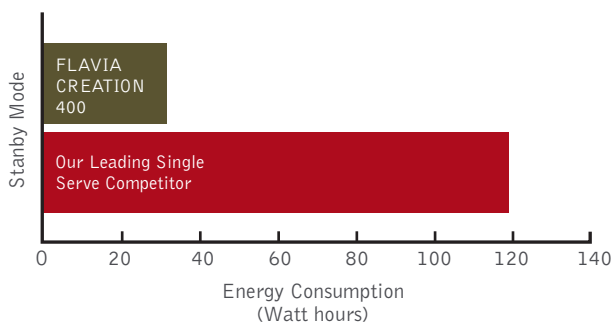

ENERGY EFFICIENCY IN ACTION

The FLAVIA CREATION 400 has been designed with energy efficiency in mind:

- The brewer switches to standby mode if it is not used for a period of time. You can set the stand-by timeout between 1 minute and 4 hours
- It has been designed to heat only enough water for a few drinks at a time, avoiding unnecessary boiling
- The brewer contains energy-efficient LED indicators

Designed to be as energy efficient as possible.

- The FLAVIA CREATION 400 is more energy efficient than the leading single serve competitor. Tests revealed the leading competitor in single serve uses 26% more energy.
- The FLAVIA CREATION 400 has a standby mode to conserve energy, when in standby mode it outperforms all of the leading table-top freshbrew office coffee machines tested.

CONSIDER FITTING A WATER FILTER

An activated carbon ion exchange filter has two main benefits:

- The activated carbon removes impurities from the water supply ensuring you get the optimum flavour and aroma from your drink.
- If you are in a hard water area the ion exchange removes scale properties, reducing limescale build up, increasing your brewer's reliability and energy efficiency and improving the quality of your drink.

Plumbed in FLAVIA CREATION 400 brewers can be installed with an in-line water filter to ensure you get the best tasting drink possible.

For jug filled machines using a filter jug when filling the brewer has the same effect.

Ask your distributor for more information on filters.
